The first six star tumble dryer

EcoComfort Heat-pump dryer T 8627 WP

Exceptionally efficient drying

The **EcoComfort** has achieved a 6 star energy rating, making it the most energy efficient condenser dryer on the Australian and New Zealand market. Energy savings of up to 46% can be achieved over a conventional condenser dryer.

DESIGN

6.0 kg load capacity. Unique HoneycombCare drum with illumination and large opening (left-hinged), sloping fascia.

DRYING SYSTEM

Condenser dryer with heat-pump technology Miele Sensitive System for precise, economical drying and optimum fabric protection. Easily accessible large fluff filter. Easy to empty condensed water container or pump away facility.

ELECTRONIC CONTROLS

Designed and made by Miele
PC Update facility, child resistant.

PROGRAMME SELECTION

Single dial control and large interactive LCD display for detailed programme information. Delay start with running time indicator.

STANDARD LAUNDRY CARE PROGRAMMES

Cottons, Minimum Iron, Automatic+ with individual drying levels.

SPECIAL CARE LAUNDRY PROGRAMMES

Woollens handcare, Smoothing (easy care), Delicates, Silks Handcare, Shirts, Denim, Outerwear, Sportswear, Standard Pillows, Large Pillows, Basket programme, warm air, cool air.

ADDITIONAL FUNCTIONS

“Gentle tumble” for delicate items, “Freshen up” to eliminate unpleasant odours in clean clothing, Buzzer, Anti-crease phase.

EFFICIENCY RATING

Energy 6 stars.

SAFETY FEATURES

“Empty condensed water container” indicator. Secondary filter to prevent build-up of fluff in condenser unit.

MATCHING WASHING MACHINES

Matches all W 3000 series washing machines WTV 412
Universal stacking kit, WTV 407 Stacking kit with pull-out shelf.

OPTIONAL ACCESSORIES

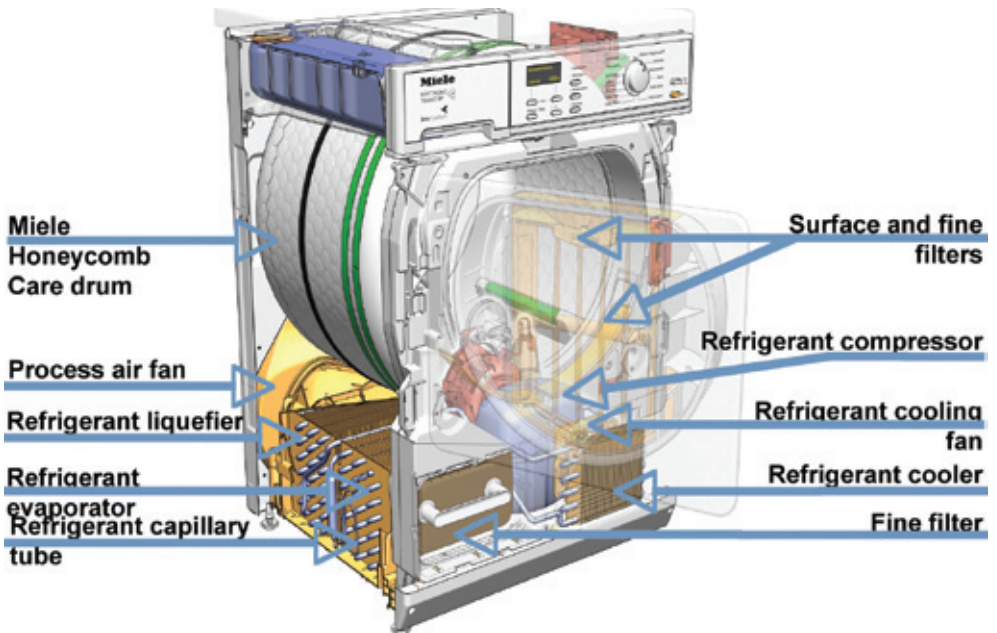

TK 111 Drying basket UBS W/T S Kit for under-bench installation without lid.

GUARANTEE

Two years parts and labour.

How the revolutionary heat-pump works

Miele's EcoComfort Heat-pump dryer involves two closed circuits: the process air circuit and the cooling circuit. The cooling circuit has two functions: firstly heat energy is transferred to the process air and, secondly, residual heat from the process air is recovered and dehumidified. This makes the use of energy highly efficient.

Consider the immediate benefits

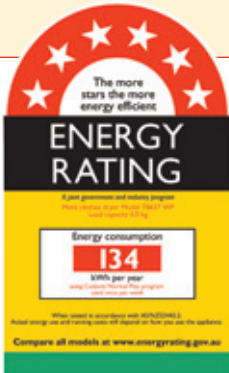

- Energy savings of up to 46% compared to a conventional Miele condenser dryer.
- Saves up to \$1,935 in electricity over a 20 year period.*¹
- Payback after 3.5 years.*²
- Reduction of drying temperatures by 25%.
- Reduction of CO₂ emissions by 46% due to lower energy consumption.

*1 Cost difference compared to T 8633C

*2 Based on 0.15 KWh / 5 loads per week.
Refer www.energyrating.gov.au

Reduces operating costs up to 46%

- **Operating costs reduced up to 46%**

The first tumble dryer to achieve a six-star energy efficiency rating in Australia - dramatically reducing operating costs and CO₂ emissions by up to 46% compared with conventional condenser dryers. It's so energy efficient that when compared to a conventional condenser dryer it will pay back the cost difference within a few short years of its 20 year lifespan.

- **Advanced gentle fabric care**

Improved fabric care is a key benefit thanks to the HoneycombCare drum and the patented Sensitive System found on all Miele condenser dryers. An important benefit of the EcoComfort is the reduction of drying temperatures. This further reduces the strain on laundry and corresponds to the 'reduced drying' laundry care symbol found on many garments.

- **Shhhhhhh!**

Further reducing stress on your environment, Miele's special construction and comprehensive sound insulation package makes the EcoComfort markedly quieter than other tumble dryers.

- **Environmentally friendly**

All Miele appliances have been German engineered to last for up to 20 years of average household use. Add to this the reduced energy consumption and reduced CO₂ emissions and the EcoComfort Heat-pump dryer has impeccable green credentials.
